

ROBOTHERM

Robotics and Thermal Process Solution for Electronics Assembly,
Semiconductor Packaging and Engineered Products industries

MATERIAL HANDLING SYSTEM

TAPE & REEL HANDLER SERIES

Automatic Winder/Unwinder E/D 802

APPLICATIONS

Reel-to-Reel Processing

- Unwinding of Large Tape / Winding of Separator
- Winding of Large Tape / Unwinding of Separator

FEATURES & BENEFITS

Tape Reel mounted on the Motorized/Braked Shaft
Separator Reel mounted on the Braked/Motorized Shaft

Adaptable Back Flange
Self Centering Nuts

Loop Photo Detection

Splice Table

A Pulley & Multi "Vee" Belt system allows manual winding/unwinding without any risk of damage to the shafts nor the motors.

Vibration free

Compatibility with the widest range of reels

Stable and Reproducible process

Cleanroom Compatible

Optimal accessibility for service and maintenance
Durable low maintenance design for maximum "uptime"

Common European (CE) Product Safety Certification
SME/MA Compliant

In Robotherm's policy for continuous improvement, specifications can change without prior notice
